

# **Good Manufacturing Practice (GMP) Certification Scheme**

Good Manufacturing Practice (GMP) certification scheme can assist manufacturers of food products and food related products to provide assurance to their customers that their products are manufactured in a hygienic manner and in accordance to best practices in manufacturing.

Since GMP is one of the pre-requisite programmes (PRP) required to be established before Hazard Analysis and Critical Control Points (HACCP) can be implemented, having GMP certification would definitely pave the way to an easier HACCP implementation and certification.

Generally, GMP consists of aspects such as design and facilities in the establishment, control of operations by equipment, temperature, time, pH or water activity control, maintenance and sanitation, personal hygiene, personnel training, transportation, conveyors, product information and consumer awareness. In short, it comprises the basic requirements of a manufacturing facility covering establishment, infrastructure, equipment design, construction, maintenance, process controls and personnel hygiene and awareness.

MS 1514 is the standard for prescribing the requirements of pre-requisite programmes which is required to be established before the implementation of HACCP. The standard is applicable to all food manufacturers, primary and secondary processors, food catering and service operators, food retailers and food related industries.

## **The Benefits of Certification**

- Builds consumers' confidence that food is produced in accordance to the best manufacturing practices.
- Easier to obtain HACCP certification.
- Enhances image of the company in the production of safe food and increase competitive edge in the international market.
- Facilitate the process of meeting the requirements of Malaysian Food Act 1983 and Malaysian Food Regulations 1985.

## **Why SIRIM QAS International?**

SIRIM QAS International is the market leader in certification, inspection and testing services. In some of the certification services such as product certification, quality management system certification and environmental management system certification, SIRIM QAS International is the pioneer certification body in Malaysia operating since 1972.

With over 36 years of certification experience and being accredited by the United Kingdom Accreditation Service (UKAS) and Department of Standards Malaysia (STANDARDS MALAYSIA) for its certification services, SIRIM QAS International has the most competent, experienced and multi-skilled auditors conducting various audits. Furthermore, the accreditations obtained from the accreditation bodies attest the competency of the auditors and the compliance of the certification services provided by SIRIM QAS International to International Standards and Guides which make SIRIM QAS International on par with the other foreign certification bodies.
