**2.0 Audit process**

2.1 Audit methodology

The MSPO initial certification audit consist of stage 1 and stage 2 audit however for SOU 33 the stage 1 audit was waive due to they have obtain RSPO certification with SIRIM QAS International. The. Stage 2 audit of Derawan SOU 33 was conducted on 14-15 November 2017 where the audit focused mainly on the conformance of the group members against the requirements of certification standard i.e. MS 2530-3: 2013 General principles for oil palm plantations and organised smallholders.

The audit was conducted based on sample as defined in the MSPO Certification Requirement for Group Certification. Under this requirement, the sample size was based on the formula  $(0.8\sqrt{y}) \times (z)$ ; where y is total number of independent group members and z is the risk factor defined by the risk assessment. Based on the risk assessment, the risk factor was determined as low i.e. 1.0. During the Stage 2 audit Saha estate and Damai Estate has been sampled, the audit team had visited the field, linesite workshop, chemical store, waste collection areas and other surrounding facilities such as clinic, surau and canteen to verify the implementation of the MSPO MS2530-3. Interviews with the team management, employees, contractors and surrounding estate, relevant government agency and other relevant stakeholders. Apart from the above, records as well as other related documentation were also evaluated. In addition, the audit team has verified the MPOB license and its validity.

It is important to note that the finding from this audit is based on samples taken from the organization activities, procedures, records and interview. Statistically, there is always a possibility that one or more issues/areas will remain unidentified during the course of this audit. The absence of non-compliance in any area or activity does not necessarily imply that no lapses or non-compliance exist.
