

AUTO SERVICE

CERTIFICATION SCHEME

Quality improves perceptions and drives business growth

Over the years, the demand for

the automotive aftermarket and motor vehicle service and spare parts industry in Malaysia has transformed the domestic businesses into a highly competitive environment due to the rapid growth of vehicles recorded every year, contributing billions to the country.

The increase of demand for enhanced aftermarket services that include improved service abilities with proper procedures and skilled mechanics, spare parts standardisation and favourable insurance coverage has been one of the catalysts that pushed for the establishment of Auto Service Certification Scheme, MS 2697 Motor Vehicle Aftermarket – Repair, Reuse, Recycle and Remanufacture for parts and components (4R) and MS 2696 Motor Vehicle Aftermarket – Service and Spare Parts (2S).

MS 2697 aims to ensure the implementation of reuse, repair, recycle and remanufacture initiatives are appropriate to achieve the optimum standard in product and process quality, consumer safety and protection, environment safeguarding and business sustainment.

MS 2696 aims to ensure aftermarket service provider can provide the appropriate services that comply with best industry practices. The relevant services include vehicle system diagnostic, repair and maintenance, supply of auto parts and workforce skills enhancement.

If you are an industry player involved in repairing, reusing, recycling and remanufacturing vehicle's parts and components and a motor vehicle services and spare parts provider in Malaysia; looking to elevate your business' standard and operation as well as to reposition your business in the market, Auto Service Certification Scheme will help you achieve those goals by changing the perception of your customers.

Certification Process:

Why SIRIM QAS?

SIRIM QAS is an internationally recognised conformity assessment body with decades of experience in providing testing, inspection and certification services to both local and international customers.

As a member of the International Certification Network (IQNet), it further enhances the acceptance and recognition of the certificates around the world and enable us to provide certification services globally.

We also gained accreditations from leading accreditation bodies such as the Department of Standards Malaysia (STANDARDS MALAYSIA) and the United Kingdom Accreditation Service (UKAS). These accreditations not only demonstrate the competence of our personnel and the credibility of our certification processes but also ensure the international recognition of our certificates.
