

# Fire Listing Scheme

SIRIM QAS International through its Product Certification Section offers Fire Listing Scheme. The Fire Listing Scheme is applicable to products, components and building materials which only comply with the fire resistance test or reaction to fire tests.

Acceptance into the scheme is subject to the approval by the Certification Panel of SIRIM QAS International. Under this scheme, any national and international standards on the determination of fire resistance properties and reaction to fire can be used but their acceptance is based upon an agreement between SIRIM QAS International and the Fire and Rescue Department of Malaysia.

## The Benefits of Fire Listing Scheme

- The scheme assists the Fire and Rescue Department of Malaysia and designers in the identification of components/products complying to fire resistance properties.
- The scheme provides an independent assurance that the tests are conducted in accordance with the stated specification, test method and correct test environment.
- The scheme enhances manufacturers' image and reputation as the quality of the products are consistently maintained with the implementation of a proper system of supervision and control.
- Products bearing SIRIM marks/labels provide an excellent marketing tool and build up customer acceptance and confidence on the quality and safety of the products.
- The scheme assists the Fire and Rescue Department of Malaysia in approving building materials based on the classification specified in the Uniform Building By Law (UBBL).

## Why SIRIM QAS International?

SIRIM QAS International has made a mark as the leading certification, inspection and testing body in Malaysia with wide recognition nationally and internationally.

With the aim to gain better recognition and provide credible services to the industries, the Product Certification Section has been successfully accredited by the Department of Standards Malaysia (STANDARDS MALAYSIA) to the requirement of ISO/IEC Guide 65 while the testing house, which is Fire Protection Section has been accredited by the Department of Standards Malaysia (STANDARDS MALAYSIA) to the requirement of ISO/IEC 17025 under the National Laboratory Accreditation Scheme. This accreditation demonstrates our credibility in meeting the stringent requirements of the international standards.

Over the years, SIRIM QAS International has been playing a prominent role in fulfilling its functions. In order to facilitate and fulfill industry needs and requirements, we engage a large pool of technically competent and experienced professionals. The tests are conducted to national and international standards using state-of-the-art facilities operated by highly competent personnel.
