Certification Scheme

*For organisations and those who utilize security services
to demonstrate commitment to the relevant legal obligations*

BEST PARTNER FOR INNOVATION

SIRIM

ISO 18788

ISO 18788 - Management System For Private Security

performs an important role in protecting state and non-state clients engaged in relief, recovery, and reconstruction efforts of commercial business operations, development activities, diplomacy, and military activity. It is in line with the Guiding Principles on Business and Human Rights; Implementing the United Nations "Protect, Respect and Remedy" Framework 2011, which resting on three pillars:

- the state duty to protect against human rights abuses by third parties, including business;

- the corporate responsibility to respect human rights; and
- greater access by victims to effective remedy, both judicial and non-judicial.

This standard implements a business risk management framework for organisations conducting or contracting security operations and related activities and functions while demonstrating:

- conduct of professional security operations to meet the requirements of clients and other stakeholders;
- accountability to law and respect for human rights; and
- consistency with voluntary commitments to which it subscribes.

The generic principles and requirements of the Standard are intended to be incorporated into any organisation's integrated management system based on the Plan-Do-Check-Act (PDCA) model. It is not intended to promote a uniform approach to all organisations in all sectors.

The design and implementation of security operations plans, procedures and practices are expected to take into account the particular requirements of each organisation: its objectives, context, culture, structure, resources, operations, processes, products and services.

+ The Benefits

- Enables an organisation to have specific requirements and guidance in conducting or contracting security operations.
- Enables an organisation to establish a business and risk management framework to ensure security operations are conducted effectively.
- Applicable to any organisation operating in circumstances where governance may be weak or rule of law undermined due to human or naturally caused events.

WHY SIRIM QAS?

SIRIM QAS is an internationally recognised conformity assessment body with decades of experience in providing certification, inspection and testing services to both local and international customers.

As a member of the International Certification Network (IQNet), it further enhances the acceptance and recognition of the certificates around the world and enable us to provide certification services globally.

We also gain accreditations from leading accreditation bodies such as the Department of Standards Malaysia (STANDARDS MALAYSIA) and the United Kingdom Accreditation Service (UKAS). These accreditations not only demonstrate the competence of our personnel and the credibility of our certification processes but also ensure the international recognition of our certificates.

Certification Process:

- 1 Application
- 2 Stage 1 Audit
- 3 Stage 2 Audit
- 4 Approval Stage
- 5 Certificate Granted
- 6 Surveillance Audit
- 7 Recertification Audit
