

SUPPLY CHAIN SECURITY MANAGEMENT SYSTEM

CERTIFICATION SCHEME

Provides a Framework for Security Management System which is Aimed at Improving the Overall Security of Supply Chains

BEST PARTNER FOR INNOVATION

SIRIM

ISO 28000

Supply risks such as threats from terrorism, fraud, and piracy have serious implication to businesses. Throughout the supply chain, organizations must manage these risks and assure security by identifying potential threats, assessing risks and implementing measures to prevent any risks and threats from adversely affecting the success of their business.

ISO 28000 “Specification for security management systems for the supply chain” provides a framework for a security management system which is aimed at improving the overall security of supply chains. This standard will facilitate trade and the transport of goods across borders. It will increase the ability of organizations in the supply chain to effectively implement mechanisms that address security vulnerabilities at strategic and operational levels, as well as to establish preventive action plans. This standard can be applied by organizations of all sizes involved in manufacturing, service, storage or transportation at any stage of the production or supply chain.

+ The Benefits

- Improves stakeholder confidence by demonstrating more robust and secure supply chain management.
- Enhances customer satisfaction by demonstrating the ability to meet their specific requirements.
- Demonstrates systematic security supply chain management.
- Makes the organization a supplier of choice by demonstrating the organization’s capability to manage security issues within the supply chain.
- Develops business cooperation along the supply chain.
- Shortens customs clearance time and reduced secondary inspections.
- Facilitates compliance with other official trade and supply chain processes, including the European Union’s Authorized Economic Operator (AEO), and US Customs and Border Patrol (CBP)s Custom Trade Partnership Against Terrorism (C-TPAT).

WHY SIRIM QAS?

SIRIM QAS is an internationally recognized conformity assessment body with decades of experience in providing certification, inspection and testing services to both local and international customers.

As a member of the International Certification Network (IQNet), it further enhances the acceptance and recognition of the certificates around the world and enable us to provide certification services globally.

We also gained accreditations from leading accreditation bodies such as the Department of Standards Malaysia (STANDARDS MALAYSIA) and the United Kingdom Accreditation Service (UKAS). These accreditations not only demonstrate the competence of our personnel and the credibility of our certification processes but also ensure the international recognition of our certificates.

Certification Process:

- 1 Application
- 2 Stage 1 Audit
- 3 Stage 2 Audit
- 4 Approval Stage
- 5 Certificate Granted
- 6 Surveillance Audit
