## IECEE CB Scheme

The IEC system for Conformity Testing and Certification of Electrotechnical Equipment & Components (IECEE) CB Scheme is a multilateral certification system based on standards prepared by the International Electrotechnical Commission (IEC). The scheme utilizes CB Test Certification to attest that the product samples have successfully passed the appropriate test and are in compliance with the requirements of the relevant IEC standards.

Manufacturers of electrical and electronic products who wish to break into new export markets can participate in this IECEE CB Scheme in order to overcome trade barriers caused by different certification criteria in different countries.

**The Benefits of Certification**

- Overcome technical barriers to trade cause by certification criteria.
- Make use of the CB Test Report and Certificate to obtain national approvals in IECEE member countries through their participating national certification bodies.
- Cost avoiding and time efficient in multiple testing and approving.
- Customer assurance in the consistency level of electrical equipment safety.
- Product acceptance and accessibility in local and international market.

**Why SIRIM QAS International?**

SIRIM QAS International is the first Certification Body in the country to obtain accreditation from the Department of Standards Malaysia (STANDARDS MALAYSIA) for Product Certification Scheme against the ISO/IEC 17065, while laboratories are accredited to ISO/IEC 17025.

SIRIM QAS International has also been accepted as the Issuing and Recognizing National Certification Body (NCB) and CB Testing Laboratories (CBTL).

**YOUR NEXT STEP> Application Process**

1. Enquiry
2. Submission of application
3. Issuance of quotation
4. Payment of fees and submission of samples
5. Conduct testing
6. Issuance of CB Test Reports
7. Issuance of CB Test Certificates
8. Registration of CB Test Certificates on-line
