

ENVIRONMENTAL MANAGEMENT SYSTEMS

CERTIFICATION SCHEME

Enhance business value by demonstrating care for the environment

ISO 14001 is a worldwide standard

that specifies the requirements for Environmental Management Systems. Progressively, business industries are committing in reducing the impact on the environment.

Organisations that implement Environmental Management Systems in accordance with this standard are required to systematically determine and manage the context of the organisation, including environmental aspects and impacts resulting from their activities, products and services.

Climate change is a real threat affecting every country on every continent. We can no longer ignore its consequences on national economies and the well-being of people and communities all over the world. It is time to safeguard our future by working in harmony with the environment.

With this certification, organisations benefit from greater access to the “green market” for eco-friendly products and services, besides the positive brand image and competitive edge in environmental performance and social responsibility.

SIRIM QAS International provides an extensive range of green certification services to cater to businesses and organisations from different industries, across government and private sectors. We're here to help you future-proof your business.

Benefits

- + Helps an organisation to improve its environmental performance.
- + Enhances image as an environmentally responsible organisation.
- + Provides assurance of legal compliance.
- + Facilitates access to the growing “green market”.
- + Cost-saving through the efficient use of resources and proper management of waste.

Certification Process:

Why SIRIM QAS?

SIRIM QAS is an internationally recognised conformity assessment body with decades of experience in providing testing, inspection and certification services to both local and international customers.

As a member of the International Certification Network (IQNet), it further enhances the acceptance and recognition of the certificates around the world and enable us to provide certification services globally.

We also gained accreditations from the leading accreditation bodies such as the Department of Standards Malaysia (STANDARDS MALAYSIA) and the United Kingdom Accreditation Service (UKAS). These accreditations not only demonstrate the competence of our personnel and the credibility of our certification processes but also ensure the international recognition of our certificates.
