2.1 Audit methodology

The MSPO initial certification audit of Pineapple Cannery of Malaysia Sdn Bhd consists of Stage 1 and Stage 2 which was conducted on 24-25 January 2019 and 2-4 April 2019 respectively.

The main objective of stage 1 audit was to ensure relevant documentations were established as required, as well as to review the field conditions and the surrounding areas such as buffer zones and perimeter boundary. The Stage 2 audit focused on the conformance of the organization in reference to the requirements of certification standard of MS 2530-3:2013 – General Principles for oil palm plantations and organized small holders as well as company's Manual / Procedures. During the Stage2 audit process, the audit team has visited the followings such as:

- field,
- line-sites,
- workshop,
- chemical stores and schedule waste store,
- and other relevant facilities.

Interview with the team management, employees, contractors and stakeholders also conducted. Other than that, records as well as related documents also being evaluated.

The numbers of site audited was based on formula for calculating sample size of the audit, i.e. in accordance with Malaysian Sustainable Palm Oil (MSPO) Risk Management (Doc. No.: MPOB/MSPO/RMP/06 dated 19 Nov 2013). During this audit, two estates were sampled, i.e. Ladang Ayer Baloi and Ladang Machap.

It is important to note that the findings during the audit assessment in based on evidence from random samples taken from the organization's activities, procedures, records and interviews. Statistically, there is a possibility that there is issues/areas will remain unidentified during the course of this audit. The absent of non-compliance in any areas of activity does not necessarily imply that no lapses or non-compliance exist.
