

FACILITY MANAGEMENT (FM) SYSTEMS

CERTIFICATION SCHEME

Improving the quality of life of people and the productivity of core business

Effective Facility Management (FM) systems ensure

the functionality, comfort, safety and efficiency of the built environment, namely shopping complexes, condominiums, office buildings, hospitals, hotels, education providers and government offices. *The outsourced component of the global market for FM is expected to grow to USD 1 trillion by 2025. Given the size of the FM business, both globally and in Malaysia, and the impact that the service has on people, it is imperative that providers of FM services manage, operate and maintain facilities in accordance with internationally recognised norms.

FM integrates multiple disciplines in order to have an influence on the efficiency and productivity of economies of societies, communities and organisations, as well as the manner in which individuals interact with the built environment. FM affects the health, well-being and quality of life much of the world's societies and population through the services it manages and delivers.

Helping You Through

ISO 41001

ISO 41001 establishes a benchmark for developing and driving effective strategic, tactical and operational FM systems and practices. The standard is applicable to both the FM function within an organisation as well as to external providers of FM services. The standard also assists organisations seeking to outsource FM services. Those service providers who are able to demonstrate conformity with the standard will provide the demand organisations with an assurance regarding their approach and processes.

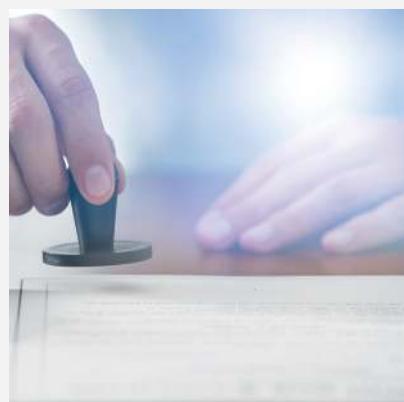

FM service providers who obtain certification to the standard can assure customers and potential customers that they operate to best-in-practice standards. This will enhance their marketability and provide them with an edge when competing with non-certified FM service providers.

Certification Process:

Why SIRIM QAS?

SIRIM QAS is an internationally recognised conformity assessment body with decades of experience in providing testing, inspection and certification services to both local and international customers.

As a member of the International Certification Network (IQNet), it further enhances the acceptance and recognition of the certificates around the world and enable us to provide certification services globally.

We also gained accreditations from leading accreditation bodies such as the Department of Standards Malaysia (STANDARDS MALAYSIA) and the United Kingdom Accreditation Service (UKAS). These accreditations not only demonstrate the competence of our personnel and the credibility of our certification processes but also ensure the international recognition of our certificates.
