

Reach for the  
**STAR and  
Save 3.0**

## STAR rating and Minimum Energy Performance Standards (MEPS)

Household appliances namely television, refrigerators, domestic fans, air conditioners, washing machines, microwave ovens and rice cookers are required to meet the Minimum Energy Performance Standards (MEPS) and at least achieve a 2-Star rating before they

can be sold in Malaysia. Meanwhile, lamps are required to meet a minimum efficacy value. An energy efficiency label will be affixed on products that meet the relevant requirements.

Did you know that The Sustainability Achieved Via Energy Efficiency (SAVE) 3.0 program grants a maximum RM400 e-Rebate to domestic households that purchase energy efficient with 4 star or 5-star energy efficiency labels from the Energy Commission (ST) in 2021?

## Calling The Electrical Appliances Industry and Manufacturers to Reach for the STAR with SIRIM

If you are a manufacturer or industry related to electrical products and equipment, you would have heard of the Energy Efficiency Labelling Programme. Under this initiative, each product is rated according to its compliance with energy efficiency standards. As the testing house appointed by the Suruhanjaya Tenaga (ST), SIRIM QAS is here to help.
