

# ASSET MANAGEMENT SYSTEM

CERTIFICATION SCHEME

The Greatest Asset is Good  
Management

**An asset management system connects all the elements needed to establish policies, objectives and processes to realise the full value of your organisation's greatest assets. It can result in greater efficiency which satisfies the needs and demands of your internal and external stakeholders.**

### **Getting It Done – ISO 55001 Asset Management System Certification Scheme**

ISO 55001 is an international standard that outlines the requirements needed to establish, implement and maintain an improved asset management system. This system can be implemented by businesses in a range of sectors – from utility sectors, facility management services, railway networks and mining enterprises to food manufacturers, airports, pharmaceutical companies and petrochemical plants.

It is also applicable to organisations that deal with the management of intangible assets such as stocks, bonds, patents and copyrights, allowing businesses to demonstrate good practice in asset management consistently, and meet the needs and expectations of their stakeholders.

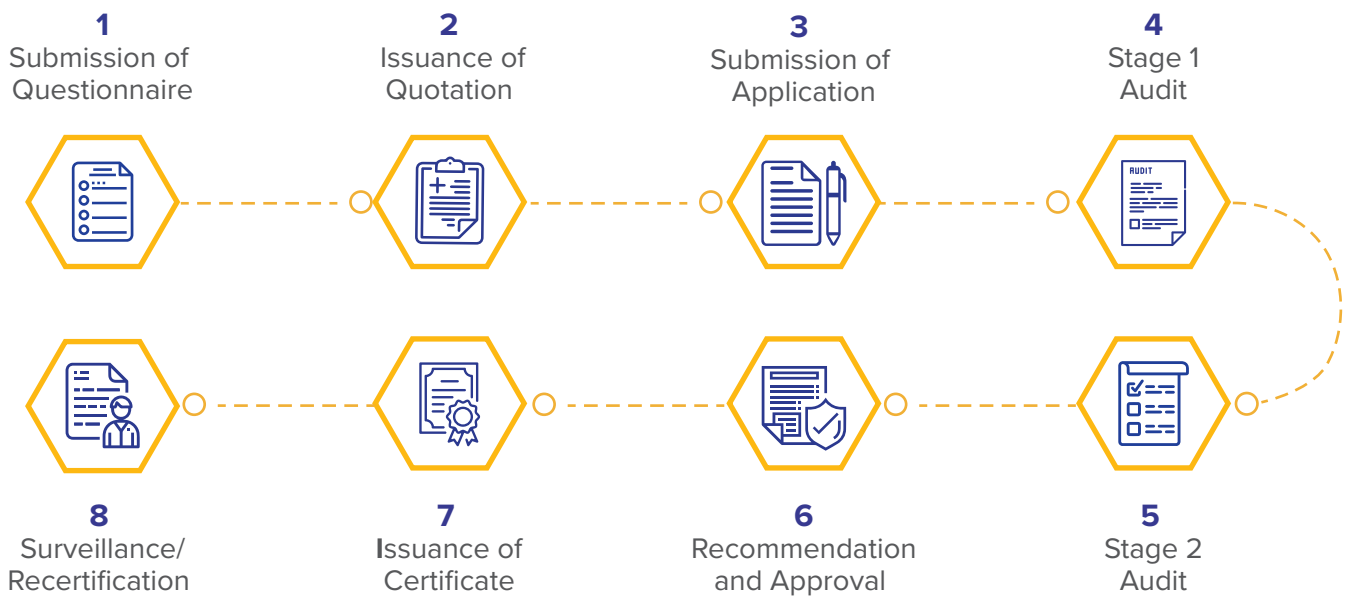

The certification helps implement cost-effective measures to managing monetary and physical assets. It can ensure optimisation of resources, which improves productivity levels in all reaches of the business.

Through the proper implementation of asset management, a company's brand integrity can be improved. Once investors and customers are assured that the company's assets will fulfil their purpose in a safe and optimal way, any organisation can build a steady foundation of trust and confidence.

## Why Get Certified

- Improves organisational efficiency around asset management.
- Better risk management surrounding ownership of assets.
- Cost-effective solution by optimising asset life-cycle.
- Assures internal and external stakeholders of good safety and environmental performance.
- Establishes a strong corporate reputation of reliability and trust.
- Demonstrates a benchmark of good practices across different industries.

## Certification Process

## SIRIM QAS – Here To Help

SIRIM QAS International, a premier provider of management system certification services in the region, has accreditations from leading accreditation bodies such as the Department of Standards Malaysia (STANDARDS MALAYSIA) and the United Kingdom Accreditation Service (UKAS) for most of the certification schemes that are offered. These accreditations demonstrate the work of our highly experienced and competent auditors, that can provide value-added auditing and certification services across a wide range of sectors.

As Malaysia's leading Conformity Assessment Body with years of experience in providing testing, inspection and certification services to both local and international customers, SIRIM QAS is your partner for certification services on management systems. As a member of the International Certification Network (IQNet), our certifications are accepted and recognised worldwide.
