

FACILITY MANAGEMENT SYSTEM

CERTIFICATION SCHEME

**Integrating Management for Growth and
Longevity**

Applying systems to increase efficiency and productivity. The ISO 41001 Facility Management System takes into account environmental, financial, efficiency and compliance aspects to help companies achieve greater profitability and improve the quality of life of communities through their services.

Productivity and Well-Being under One Roof – ISO 41001 Facility Management System Certification

Organisations are constantly looking for ways to manage resources efficiently while also increasing productivity. Achieving this requires examining existing assets to identify redundancies and areas for improvement. Being one of the largest operating costs, effective facility management (FM) can lead to greater cost efficiencies.

FM integrates technology, process and environment to ensure safety and functionality of a built environment. It covers a wide scope of work including property maintenance, cleaning, catering, security and support services.

Facilities are generally affected by a variety of factors throughout their lifetime. New technologies, customer requirements and value chain approaches demand a common standard for facility managers to maintain smooth operations.

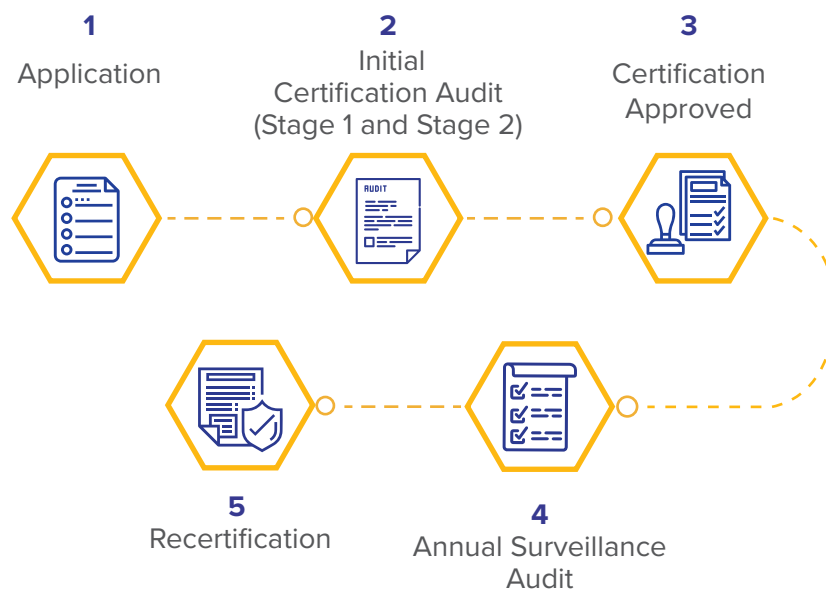

ISO 41001 outlines requirements to establish, implement, maintain and improve an integrated FM system. It provides a framework to raise competency and levels of quality in the delivery of FM for organisations of any size or type.

SIRIM QAS can assist organisations that implement or outsource FM increase the productivity of their core business, promote the well-being of their workforce and improve quality of life. This enables companies to achieve better returns on investments, realise corporate objectives, and deliver effective support, operation and maintenance services.

Why Get Certified

- Increase the well-being and productivity of the workforce.
- Inculcate a culture of continual improvement in core business processes.
- Improve efficiency and effectiveness and hence better cost efficiencies.
- Ensure consistency of service delivery and increase customer satisfaction.
- Enhance communication of FM methodologies and requirements among and between public and private sectors.

Certification Process

SIRIM QAS – Assisting in Industry Growth

SIRIM QAS is an internationally-recognised Conformity Assessment Body with years of experience providing testing, inspection and certification services to both local and international clients.

Our accreditations from the Department of Standards Malaysia (STANDARDS MALAYSIA) and the United Kingdom Accreditation Service (UKAS) demonstrate the expertise of our personnel and the credibility of our certification process for certain schemes we offered.

SIRIM QAS is a member of the International Certification Network (IQNet), which enables us to provide certification services globally. Let our team of experts assist you in implementing an effective FM system.
