INFORMATION SECURITY MANAGEMENT SYSTEM

Securing Information Confidentiality and Integrity

Protecting your information assets is vital, especially in a highly competitive business climate. Rely on SIRIM QAS to help keep your information safe through the implementation of a systematic information security management system.

Credibility in Security – ISO 27001 Information Security Management System (ISMS)

In a highly digitalised world, information security is more important than ever before. Companies that manage sensitive data need to ensure that a framework exists to protect their information assets from any possible threat, virtual or physical.

This is where SIRIM QAS comes in, with our ISO 27001 Information Security Management System Certification Scheme. The ISO 27001 is an international standard that outlines requirements for establishing, implementing and maintaining a security management system.

It covers aspects such as information security procedures and policies, asset management, physical and environmental security, human resource security, access control, incident management, business continuity, compliance management and secure operations.

With ISMS, companies, regardless of size, are able to ensure operational efficiency and trust in their deliverables. It helps mitigate the risk of unauthorised access and disclosures of confidential information, as well as nurture a compliance culture throughout the organisation.
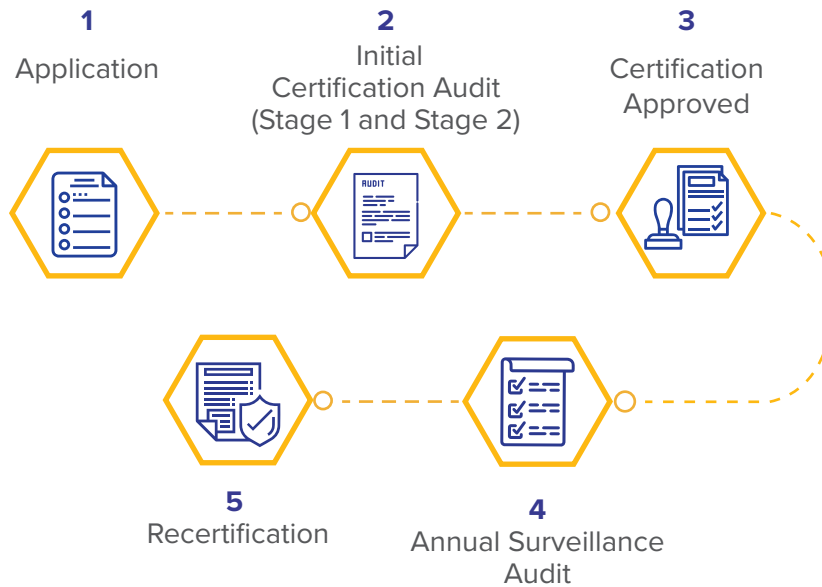

Our team of auditors are here to help ensure maximum value to your ISMS certification. The ISMS can be tailored to the needs of your organisation, and can be integrated with other relevant management systems, such as the ISO 20000 IT Service Management System (ITSMS).

ISMS

SIRIM

Why Get Certified

- Demonstrate professional credibility among industry players.
- Enhance brand visibility and reputation in local and global markets.
- Ensure operational efficiency and security through an enhanced compliance culture.
- Prevent and mitigate loss of your assets and resources.
- Increase confidence and trust of stakeholders in your products and services.
