

MATERIALS INTEGRITY

Testing Services

Building Integrity with Quality Assurance

Determine the safety, reliability and robustness of your metallic materials and lifting devices with SIRIM QAS. Our materials integrity testing includes proof load, failure investigation, laboratory and on-site testing services. Determine product integrity based on international standards and secure customer confidence in your products and services today.

Lifting Expectations - Materials Integrity Testing

Materials used across various industries need to meet specific customer, industry and regulatory requirements. This is especially true in a highly competitive marketplace where the reputation of suppliers and manufacturers is reliant on the quality and performance of their products.

Professionals at SIRIM QAS have the expertise to evaluate the safety, integrity, reliability and environmental performance of metallic products and lifting devices based on international standards. Testing provides independent assurance of quality, ensuring that materials meet the required specifications for their intended applications.

In addition, we also provide failure investigation services for metals including iron base, copper base, light metals, nickel and cobalt alloys. Failure analysis helps identify issues with quality within the manufacturing process, allowing you to resolve them effectively, contributing to product performance and quality.

SIRIM QAS is a regional leader in testing for metallic materials and products, able to conduct testing with a quick turnaround time at our fully integrated and state-of-the-art facilities in Shah Alam.

Why Get Certified

- Showcase safety, integrity and reliability and eco-friendliness of related construction materials.
- Gain access to larger markets with equally or more stringent materials requirements.
- Boost company reputation and enhance market share.
- Improve the efficiency of the production process through reliable and competent testing and failure investigation.
- Reduce the risk of liabilities that could arise from the use of substandard quality materials.
- Deliver consistent quality products that meet the expectations of stakeholders.

Application Process

SIRIM QAS – Product Integrity is Our Priority

SIRIM QAS is an internationally recognised Conformity Assessment Body with years of experience in providing testing, inspection and certification services to both local and international customers.

We gained accreditation and recognition as an International Test House from the Department of Standards Malaysia (STANDARDS MALAYSIA) under the National Laboratory Accreditation Scheme (SAMM) based on the requirements of MS ISO/IEC 17025. Our test report carries both SAMM and ILAC MRA logos.

Our expertise extends to our pool of professional and competent auditors. With our fully equipped state-of-art equipment, we remain committed to assist, evaluate and test products in a credible manner.
