

MALAYSIAN SUSTAINABLE PALM OIL (MSPO P&C) & MSPO SUPPLY CHAIN

CERTIFICATION SCHEME

**Broaden Market Access, the Sustainable
Way**

Ensure consumer confidence with credibly sourced palm oil products. Sustainability in palm oil production and supply chain is essential to ensure the long-term viability of the industry. Partnering with SIRIM QAS allows you to demonstrate compliance to national requirements to facilitate greater acceptance of your products in the market.

The World in the Palm of Your Hand – MSPO & MSPO Supply Chain Certification Schemes

Malaysia is one of the world's largest palm oil-producing countries and the industry remains integral to the country's economic growth. However, in recent years, concerns relating to environmental and social issues associated with palm oil cultivation have been gaining traction globally.

The Malaysian Sustainable Palm Oil (MSPO) Certification Scheme is a national standard, designed to promote sustainable palm oil production in Malaysia. It serves as a framework for industry players to practice greater accountability towards the social, environmental and economic aspects of their activities.

The MSPO Certification Scheme consists of an accredited oil palm management and supply chain certification. SIRIM QAS is recognised as an MSPO Certification Body by the Malaysian Palm Oil Certification Council (MPOCC), ready to help certify palm oil plantations and supply chains against national requirements.

MS 2530 Malaysian Sustainable Palm Oil (MSPO) Certification Scheme

The MS 2530 standard outlines requirements for an oil palm management certification for plantation owners, smallholders and processing facilities. Audits will be done based on seven general principles which cover the following:

Principle 1	Management commitment and responsibility
Principle 2	Transparency
Principle 3	Compliance to legal requirements
Principle 4	Social responsibility, health, safety and employment conditions
Principle 5	Environment, natural resources, biodiversity and ecosystem services
Principle 6	Best practices
Principle 7	Development of new plantings

The Government of Malaysia has made it mandatory for growers and millers to obtain MSPO certification. Smallholders, estates and mills have the option to be certified individually or collectively.

Under group certification, they may apply for a single certification for a group of estates or a group of mills respectively, or a group consisting of a combination of smallholders and estates.

Certification provides assurance to supply chain partners that plantations are managed sustainably in terms of social, environmental and safety aspects. It also encourages better use of resources, leading to increased efficiency and the ability to deliver quality products consistently.

Malaysian Sustainable Palm Oil Supply Chain Certification Standard (MSPO SCCS)

The MSPO SCCS ensures traceability throughout the supply chain - from the raw materials to the manufacture and trade of palm oil and palm oil-based products. Through this certification, organisations can gain entry to export markets by complying with stricter regulations around sustainable production.

This applies to all relevant MSPO supply chain companies which include millers, refineries, oleochemical plants and food manufacturers.

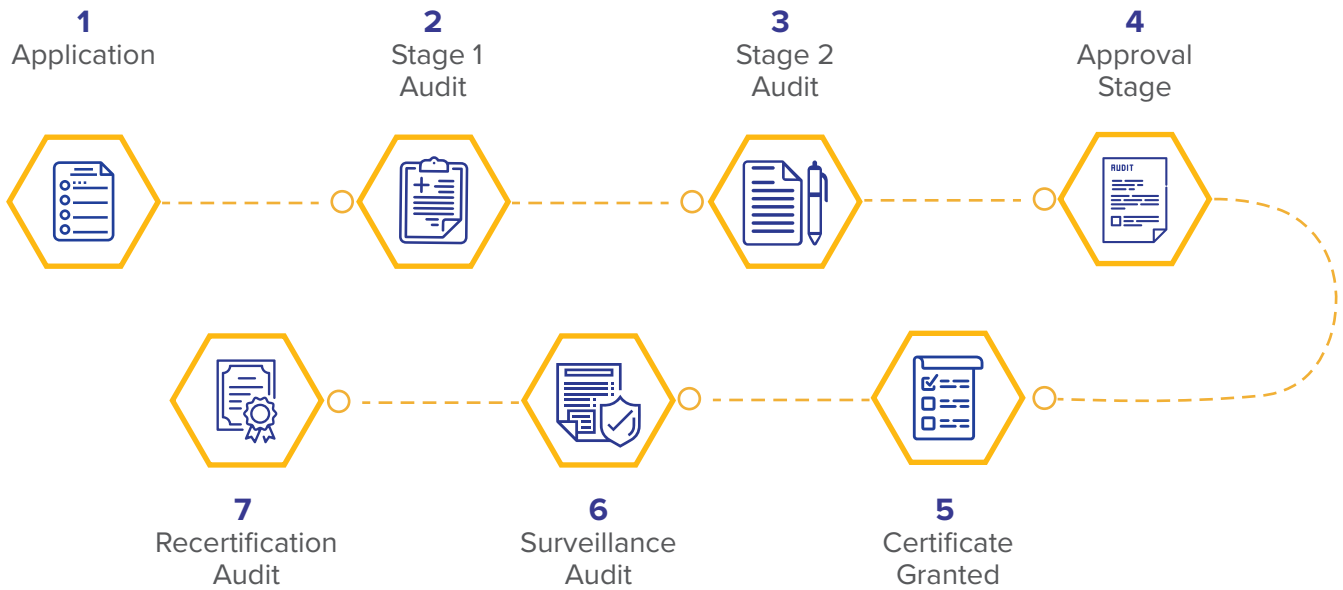

Traceability is identified through two supply chain models. The Segregation (SG) Model requires certified palm oil products to be separated from uncertified products throughout the supply chain. The Mass Balance (MB) model allows for the mixing of MSPO and non-MSPO certified palm oil products at any stage. In both cases, the end-user can be assured that they are receiving sustainably sourced goods.

Why Get Certified

- Improve quality in the production of palm oil and palm oil-based products.
- Ensure sustainable and equitable use of resources.
- Gain access to international markets and meet demands for sustainable products.
- Enhance public image through social and environmental responsibility.
- Contribute to the growth and economic development of oil palm smallholders.
- Ensure compliance with regulatory requirements for MSPO certification

Certification Process: MSPO

Certification Process: MSPO SCCS

SIRIM QAS – Committed to the Sustainability Agenda

SIRIM QAS is an internationally recognised Conformity Assessment Body with years of experience in providing testing, inspection and certification services to both local and international customers. Together with our team of highly-trained auditors with extensive experience in the palm oil industry, SIRIM QAS remains committed to offer services that meet the best interests of our clients.

We are an approved MSPO Certification Body, accredited by the Department of Standards Malaysia (STANDARDS MALAYSIA) to carry out the MSPO Certification Scheme, demonstrating the credibility and impartiality of our certification processes. Our expertise also extends to other palm-oil related certifications such as the Roundtable on Sustainable Palm Oil (RSPO) and RSPO Supply Chain Certification Standard.
