Quality All The Way – ISO 9001 Quality Management System

SIRIM

Inconsistent quality of products and services can frustrate new and repeat customers, leading to loss in sales and revenue. Once lost, a good reputation is difficult to regain. ISO 9001 Quality Management System helps to ensure that this will not happen.

The standard adopted the Plan-Do-Check-Act (PDCA) cycle and risk-based process approach methodology, the standard outlines requirements for a quality management system for all types of organisations, big or small. The adoption of a process-oriented and risk-based approach allows companies to improve overall business performance.

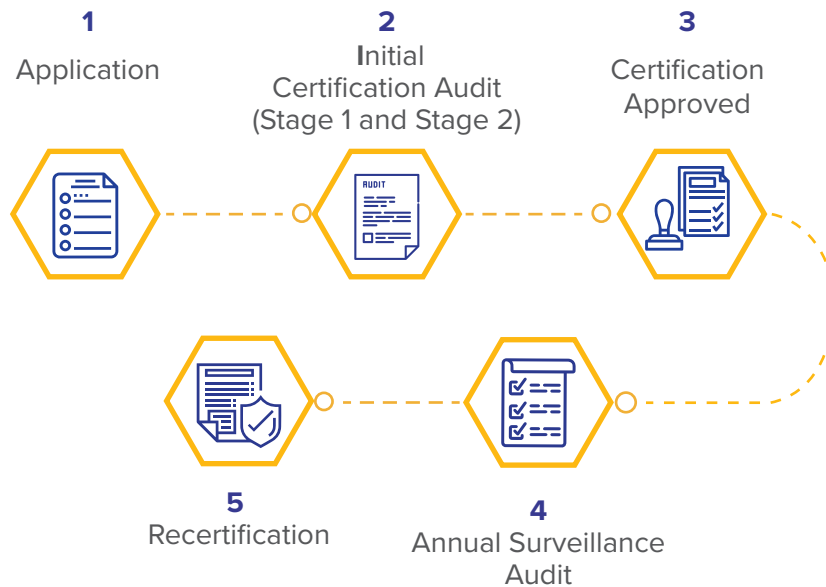

The ISO 9001 provides companies with a framework to satisfy customer expectations and regulatory requirements based on seven management principles: customer focus, leadership, engagement of people, process approach, improvement, evidence-based decision making and relationship management.

SIRIM QAS as a premier provider of management system certification services is ready to help your organisation achieve business resilience and efficiency.
