

ROUNDTABLE ON SUSTAINABLE PALM OIL (RSPO P&C) & RSPO SUPPLY CHAIN (RSPO SC)

CERTIFICATION SCHEME

**Cultivating Long-Term Economic
Viability of Palm-Oil Businesses**

Palm oil will never be out of fashion when sustainability becomes the rule and not the exception. A staple in most food and non-edible products, palm oil remains as an important raw material in many economies and communities. SIRIM QAS is ready to assist companies in the palm oil industry to meet the demands for sustainably produced raw materials and products with our range of certifications specific for the palm oil sector.

Sustaining the Growth of the Palm Oil Industry – RSPO & RSPO Supply Chain Certification Schemes

Palm oil is a common ingredient used in many food and non-edible products. However, increased demand coupled with mismanagement has put a strain on existing resources, leading to degradation of land and adverse impact to communities.

To promote the growth and use of sustainable palm oil, the Roundtable on Sustainable Palm Oil (RSPO) has established a set of international principles and criteria as a global standard. Compliance ensures the conservation of natural resources, supporting the economic viability of the industry in the long run.

With unrivalled experience in the palm oil sector, SIRIM QAS offers two types of certification services. The RSPO P&C Certification allows palm oil producers to strengthen trust of stakeholders that plantations are managed in line with applicable laws and regulations.

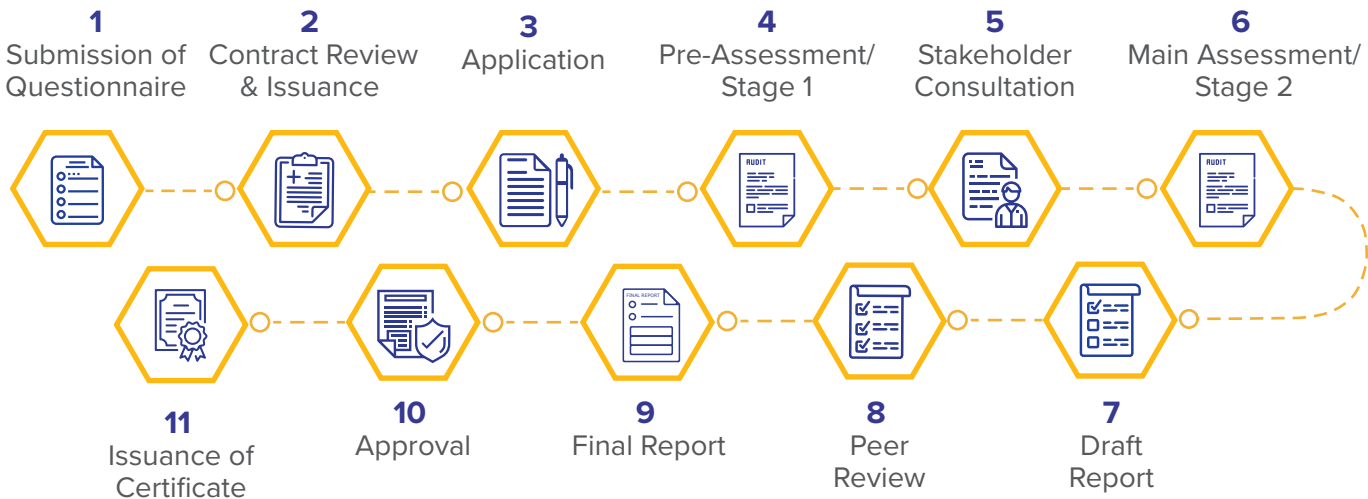

The RSPO Supply Chain Certification Scheme, on the other hand, ensures that end products can be traced to sustainable sources. This is based on three supply chain models which include Identity Preserved (IP), Segregation (SG), Mass Balance (MB) and Book and Claim (B&C).

Independent assurance from a trusted certification body like SIRIM QAS provides confidence in the palm oil and palm oil products supplied to the market, supporting the growth of the industry. It also enables companies to meet the demands of environmentally-conscious consumers in both local and international markets.

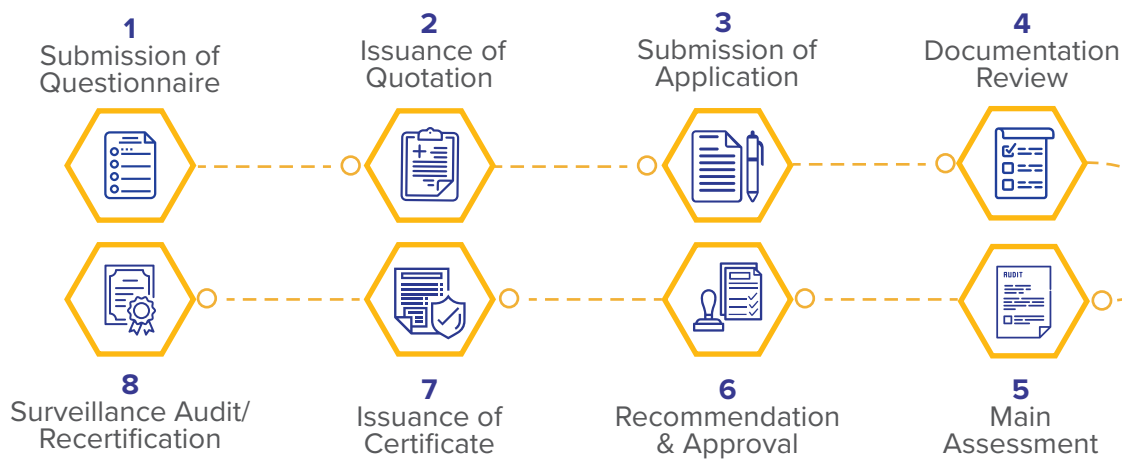

Why Get Certified

- Improve efficiency through effective management of resources and adequate planning in a manner that optimises resources and reduces wastage.
- Demonstrate compliance with applicable regulations, environmental and social standards.
- Minimise business and reputational risks that could arise from conflicts with communities or even injuries to employees at the plantations.
- Gain access to global markets by assuring stakeholders that international best practices are maintained throughout the supply chain.
- Increase cost efficiency and profit margins and mitigate unnecessary costs.

Certification Process: RSPO

Certification Process: RSPO SCCS

SIRIM QAS – Maintaining Standards with You

SIRIM QAS is Malaysia's leading conformity assessment body accredited by STANDARDS Malaysia and the United Kingdom Accreditation Service (UKAS), with decades of experience in providing testing, inspection and certification services to both local and international customers.

We are a leader in palm oil certification, largely due to our team of highly-competent auditors and experience in the palm oil sector that is second to none. SIRIM QAS is also one of the first certification bodies in the world to be approved as a RSPO and RSPO Supply Chain Certification Body by the RSPO Executive Board.

With a proven track record and established global presence, we are glad to be of service and to become your partner towards a sustainable future.
