

ROAD TRAFFIC SAFETY MANAGEMENT SYSTEM

CERTIFICATION SCHEME

**A Holistic Approach to Accident
Prevention**

Road traffic safety is a major global concern. There is an alarming trend in road injuries affecting both health and socio-economic development. The Road Traffic Safety Management Systems provide organisation with efficient use of its risk-based process to prevent, reduce, and eliminate risk of death and serious injury at their workplace or during commuting.

Reduce Future Global Road Accidents – ISO 39001 Road Traffic Safety Management Systems

The requirements of the Road Traffic Safety Management System will require organisations to adopt policies, objectives, criteria, and action plans for the development and implementation of Road Traffic Safety in order to control and improve its performance.

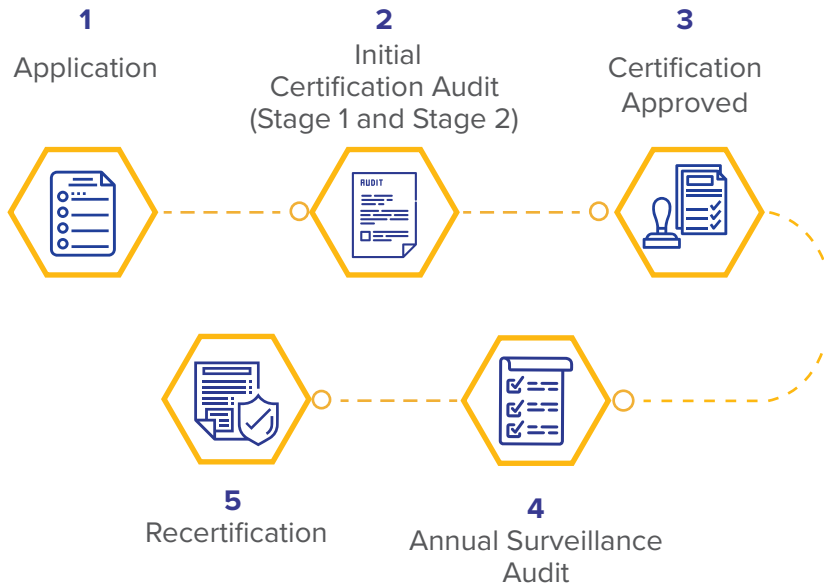

Organisations with management systems such as ISO 9001 or ISO 14001 will have the advantage of integrating the requirements of ISO 39001 into their systems at a cost-effective manner. The goal of this system is to reduce the number of serious and fatal road accidents and ultimately to ensure the safety of road traffic users.

Although there are various factors causing road accidents, using systematic and evidence-based interventions, the standard helps in preventing avoidable injuries. Our road traffic safety management system helps you overcome and manage road traffic safety challenges in a more efficient and cost-effective way. With the ISO 39001, your organisation can operate responsibly, prioritise the safety of your employees, and show consideration to other road users.

Why Get Certified

- Enhanced image of the organisation.
- Achievement of societal goals towards road accidents (injuries and death).
- Increased productivity associated with time and resources.
- Cost effective way to reduce maintenance and accident cost.

Certification Process

SIRIM QAS – Your Partner In Adopting A Holistic Safe System

SIRIM QAS is a globally accredited and recognised conformity assessment body with years of extensive experience supplying both local and international customers with testing, inspection, and certification services.

We have a large pool of experienced, professional, and internationally qualified auditors. Our multidisciplinary auditors' skills add value and credibility to our certificates. We offer multiple management system combined certifications to minimise disruption to your organisation.

We are accredited by the Department of Standards Malaysia (STANDARDS MALAYSIA) and the United Kingdom Accreditation Services (UKAS) which demonstrate the credibility and competence of our certification and the impartiality of our processes. As a member of the International Certification Network (IQNet), our certificates are accepted and recognised all around the world.
