# MANAGEMENT SYSTEM FOR PRIVATE SECURITY OPERATIONS

CERTIFICATION SCHEME

Reliability in Security Operations

Embrace operational resiliency in your security operations. Meet strategic and operational objectives while protecting the safety and security of internal and external stakeholders by certified ISO 18788 standard.

Security in Service – ISO 18788 Management System for Private Security Operations

SOMS

SIRIM

Security as a trade goes back millennia. People, organisations, and states have always relied on security services for personal safety and to support commercial business operations, development as well as relief, recovery, and reconstruction efforts.

ISO 18788 defines requirements for establishing, implementing, operating, monitoring, reviewing, maintaining, and improving management of security operations. It is applicable to organisations that conduct or contract security operations and ensures practical and effective services that meet the expectations of stakeholders.
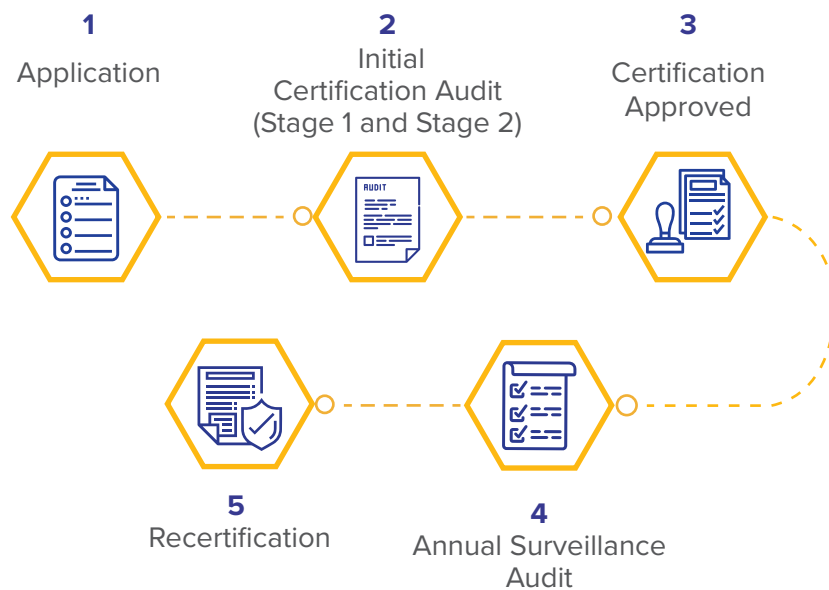

The standard also promotes accountability in security operations within a framework that upholds relevant laws and regulations and respect for human rights.

SIRIM QAS is ready to assist organisations looking to contract, conduct and enhance security management demonstrate commitment to best practices and relevant regulations.

Why Get Certified

- Enhance capacity to meet the professional requirements of clients and stakeholders.
- Provide assurance of conformity with national and international laws as well as respect for human rights.
- Assess and manage impact of security activities on local communities.
- Gain credibility by fulfilling the voluntary commitments to which your organisation subscribes.
- Ensure operational efficiency through implementation of a business and risk management framework.
