

SUPPLY CHAIN SECURITY MANAGEMENT SYSTEMS

CERTIFICATION SCHEME

**Enhance Confidence in the Delivery of
Products and Services**

Manage security risks and ensure smooth delivery of products and services. Supply chains are vulnerable to internal and external factors that could potentially lead to delays and damage of goods. Ensure the reliability of your products and services by developing an understanding of the threats present in your supply chain operations, and formulate preventive action plans to mitigate those risks.

Securing Your Value Chains – ISO 28000 Supply Chain Security Management Systems

The ISO 28000 outlines requirements for a supply chain security management system. It is designed to protect people, property, information and infrastructure in companies involved in supply chain operations.

In a fast-paced business environment, the security of supply chains is vital to facilitate trade on a global scale. Therefore, organisations need strategies in place to ensure that the movement of goods and services are reliable and efficient.

The standard encourages companies to take a risk-based approach, to identify internal and external threats to their operations and brand reputation - from physical theft and floods, to political unrest and cyber attacks.

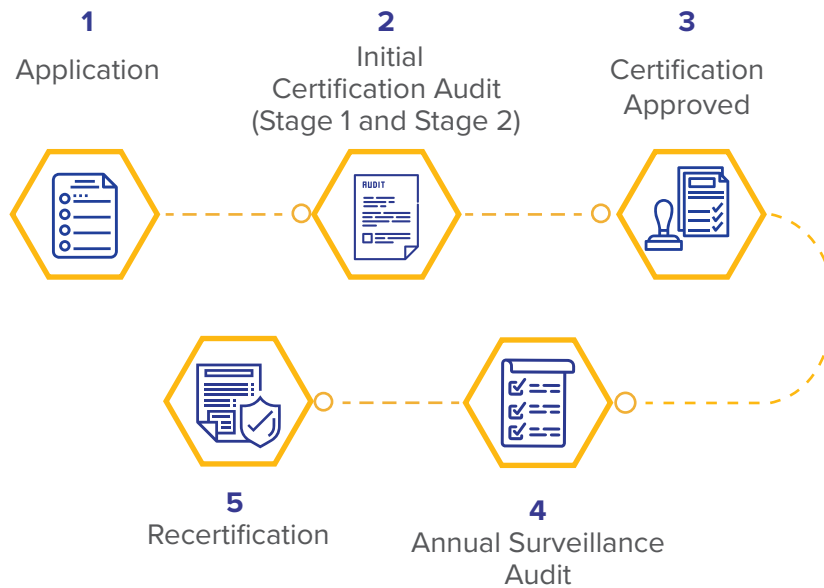

A comprehensive management system will enable companies to strengthen their brand in the market, protect their assets and avoid events that may cause the organisation to incur unnecessary costs and time.

SIRIM QAS has been a premier management systems certification provider for years, and are able to provide third-party assurance of a company's security management against the international ISO 28000 standard.

Why Get Certified

- Ensure operational continuity in the face of unforeseen events or crises.
- Enhance reputation as a supply chain partner in the market, and foster more business opportunities.
- Increase cost benefits from enhanced efficiency and avoid unnecessary costs that could arise from disruption or delay in delivery operations.
- Enhance capability to meet customer expectations through efficient delivery of products and services.

Certification Process

SIRIM QAS – A Trusted Partner for Global Businesses

SIRIM QAS is an internationally recognised Conformity Assessment Body with years of experience in providing testing, inspection and certification services to both local and international customers.

As a member of the International Certification Network (IQNet), our certifications are recognised globally. We are also accredited by leading accreditation bodies such as the Department of Standards Malaysia (STANDARDS MALAYSIA) and the United Kingdom Accreditation Service (UKAS), demonstrating the credibility, competence and transparency of our certification process.

Our years-long pursuit of dedicated service marks our commitment to deliver certification standards that elevate your organisation to the next level.
