Seven years as Forest Officer/Loggin. A qualified RSPO P & C Auditor with experience in Forest, Social and MSPO auditing.

1.3 Audit methodology

The minimum sample size should be four (4) members. For groups with fewer than four (4) members, 100% of the members shall be assessed. The following information shows sample size formula that shall be applied at every phase.

- 1) Eligibility = $(\sqrt{y}) \times (0.5)$ where y is the number of group members;
- 2) Milestone A = $(\sqrt{y}) \times (0.8)$ where y is the number of group members;
- 3) Milestone B = $(\sqrt{y}) \times (z)$, where y is the number of group members and z is the multiplier defined by the risk assessment.

The certification unit under assessment goes for Independent Smallholder Phased Approach for Certification, Claims and Benefits as:

Eligibility Milestone A Milestone B

And, in accordance with the RSPO Certification System for P&C and RSPO ISH Standard, the risk level of the size for the group has been determined as (applicable to MS B only):

Low risk (Level 1, z=1.0) Medium risk (Level 2, z=1.2) High risk (Level 3, z=2.0)

4.1 High Conservation Values (HCVs) on the smallholder plot or within the managed area and High Carbon Stock (HCS) forests identified after November 2019 using the simplified combined HCV-HCS approach, are managed to ensure that they are maintained and/or enhanced.	4.1 E Smallholders commit to protect HCVs and HCS forests through the precautionary practices approach (reference 1.1 E, Annex 2).	Yes	<p><u>Milestone B (MS B)</u> LKM Trading has committed to protecting HCVs and HCS forests through the precautionary practice approach as stated in the “Smallholder Declaration”, in Clause 7, Subclause contract agreement dated in May 2021 which has been signed by all independent smallholders.</p> <p><u>Eligibility (E)</u> The new member signed the same contract agreement in Jan 2023.</p>
	4.1 MS A Smallholders complete training on and are aware of: • the importance of maintaining and conserving HCVs and HCS forests • human-wildlife conflict and mitigation efforts • RTE species and important ecosystems.	Yes	Smallholders complete training on and are aware of the importance of maintaining and conserving HCVs and HCS forests, human-wildlife conflict and mitigation efforts and RTE species and important ecosystems. An awareness training on “ <i>Keselamatan dan Kesedaran Alam Sekitar</i> , HCV (Riparian/Buffer Zone), HCS dan RTE” was held in Nov 2022.
	4.1 MS B Smallholders implement Precautionary practices and manage and maintain RTE species, HCVs and HCS forests, where applicable.	Yes	LKM Trading continued to protect the water courses, including maintaining and restoring appropriate riparian buffer zones along all natural waterways. During site visits in 2022, it was observed that the boundaries of these riparian belts along through in or flowing nearby Sg. Litang Kecil where most of the small rivers were linked to Sg. Segama was demarcated with red paint around the palm trunk. Natural vegetation has colonized these riparian buffer belts as no weeding or fertilizer application was allowed. This buffer belt was also shown in the maps of the estates conserved. LKM Trading had adopted a water management plan to reserve 1 or 2 palms near the river as 5m by restricting agrochemicals application and is
