

Date of Issue: 14 September 2023

Affected Publication: Guidelines for Importation and Inspection of Metal Scrap,
January 2022, Edition No.1

Addendum 1

A. Changes on Inspection Processes

(i)

- Page : 12
Clause : 4.2 Pre-shipment Inspection Process - Applicable only for Method Type 1A, Type 1B & Type 1C.
Sub-clause : 4.2.15 The Pre-shipment Inspection shall cover the following activities:
- (i) Visual inspection;
 - (ii) Segregation and measurement (if applicable);
 - All costs of waste segregation including the manpower shall be borne by the Applicant. The segregation work shall be witnessed by the authorised inspector.
 - (iii) Radiation measurement (scan and measure= +0.25 µGy/h max.).

(ii)

- Page : 12
Clause : 4.2 Pre-shipment Inspection Process - Applicable only for Method Type 1A, Type 1B & Type 1C.
Sub-clause : 4.2.17 The Pre-shipment Inspection Report (issued by SIRIM or FIB) shall contain report and evidence on the following:
- Visual inspection of the vessel transporting the metal scrap and its related cargo.
 - Visual inspection of the loading of the metal scrap and the final condition of the vessel or inside the container.
 - Verification of shipping documents and ML or ICA 10.
 - Segregation, calculation, interpolation, and weighing. (Method sampling according to ISO 2859-1:1999)
 - Verification of test report on metal scrap classification, scheduled wastes, other impurities and hazardous elements (if applicable).
 - Visual evidences:
 - i. Vessel transporting metal scrap, container and metal scrap,
 - ii. Loading of the metal scrap,

- iii. Final condition inside the vessel or container after loading,
- iv. Start and end of segregation and grouping process, and
- v. Any findings from the visual inspection.
- All visual evidences shall contain:
 - i. Original timestamp and date from device,
 - ii. Location of inspection,
 - iii. Inspector conducting the inspection (selfie is acceptable).

(iii)

Page : 15
 Clause : 4.4 Post-shipment Inspection for COA Issuance - for Method Type 1C only
 Sub-clause : 4.4.6 Post-shipment inspection shall cover the following activities:
 (iii) Visual Inspection;
 (iv) Radiation measurement (scan and measure= +0.25 µGy/h max.);
 (v) Segregation (if applicable).

(iv)

Page : 17
 Clause : 4.4 Post-shipment Inspection for COA Issuance - for Method Type 1C only
 Sub-clause : 4.4.7 Upon completion of Post-shipment Inspection, SIRIM shall issue an inspection report to the Applicant that contain report and evidence on the following:

- Verification of Pre-shipment Inspection Report.
- Verification and evidence of shipping documents (Invoice, Packing List & Bill of Lading) and Manufacturing License (ML) or Confirmation Letter for a Company Exempted from a Manufacturing License (ICA 10) issued by MIDA.
- Visual inspection of the vessel transporting the metal scrap and its related cargo.
- Visual inspection of the unloading of the metal scrap.
- Segregation, calculation, interpolation and weighing. (Method of sampling according to ISO 2859-1:1999)
- Verification of testing report on metal scrap classification, scheduled waste, other impurities and hazardous elements (if applicable).
- Visual evidences for:
 - i. Vessel transporting metal scrap, container and metal scrap,

- ii. Unloading of the metal scrap,
- iii. Start and end of segregation and grouping process, and
- iv. Any findings from the visual inspection.
- All visual evidences shall contain:
 - i. Original timestamp and date from device,
 - ii. Location of inspection,
 - iii. Inspector conducting the inspection (selfie is acceptable).

(v)

Page : 19

Clause : 4.5 Inspection at Factory Storage Yard - For Method Type 2 Only

Sub-clause : Clause 4.5.6 Upon completion of the inspection, SIRIM shall issue an inspection report to the Applicant that contain report and evidence on the following:

- Verification and evidence of of shipping documents (K1 form, Invoice, Packing List & Bill of Lading) and Manufacturing License (ML) or Confirmation Letter for a Company Exempted from a Manufacturing License (ICA 10) issued by MIDA.
- Verification and evidence of SIRIM Approved MRF.
- Visual inspection of the vessel transporting the metal scrap and its related cargo.
- Visual inspection of the unloading of the metal scrap and the final condition of the vessel or inside the cargo.
- Segregation, calculation, interpolation and weighing. (Method of sampling according to ISO 2859-1:1999)
- Verification of testing report on scheduled waste, other impurities and hazardous elements (if applicable).
- Visual evidences:
 - i. Vessel transporting metal scrap, container and metal scrap,
 - ii. Unloading of the metal scrap,
 - iii. Final condition inside the vessel or container after loading,
 - iv. Start and end of segregation and grouping process, and
 - v. Any findings from the visual inspection.
- All visual evidences shall contain:
 - i. Original timestamp and date from device,
 - ii. Location of inspection,
 - iii. Inspector conducting the inspection (selfie is acceptable).

B. Changes on Schedule of Fee

(i)

Page : 21

Clause : 5 Schedule of Fees

Sub-clause : a) Pre-shipment Inspection by SIRIM (Sea Mode / Land Mode of Transport)

No	Descriptions	Fees (RM)
1	< 375 MT	1,500
2	376 to 625 MT	2,000
3	626 to 1,250 MT	3,500
4	1,251 to 3,000 MT	6,000
5	Subsequent Weight (>3000 MT)	1.80/Ton
6	Inspection Report	500/Shipment
7	Incidental	As charged where applicable for accommodation, living allowances and transportation/mileage
